Professional Summary

AI Data Analyst with 4+ years of experience in SQL, Python, Power BI, DAX, Excel, and Tableau. Experienced in transforming business requirements into analytical reports, KPI dashboards, and actionable insights. Skilled in exploratory data analysis, data cleansing, reporting automation, churn analytics, stakeholder reporting, and business performance tracking. Experienced in developing AI-enabled analytics solutions using Python, machine learning, predictive analytics, and automated reporting workflows.

Skills

- **Data Analytics**: Data Analytics: Data Analysis, Exploratory Data Analysis (EDA), Data Cleaning, Data Validation, Feature Engineering, KPI Analysis, Statistical Analysis, Business Insights, Churn Analytics, Forecasting
- **BI & Data Visualization**: Power BI, DAX, Power Query, Data Modeling, Dashboard Development, KPI Dashboards, Interactive Dashboards, Tableau, SSRS, Executive Reporting
- **SQL & Programming**: SQL, Python, Pandas, NumPy, Matplotlib, scikit-learn
- **Excel & MIS Reporting**: Advanced Excel, Pivot Tables, Power Pivot, VLOOKUP/XLOOKUP, MIS Reporting, Reporting Automation
- **Generative AI & Analytics**: Generative AI, LLMs, Prompt Engineering, AI-Powered Analytics, AI-Assisted Reporting, Natural Language Insights
- **Machine Learning**: Machine Learning, Predictive Analytics, Classification, Regression, Random Forest, Model Evaluation
- **Business & Process**: Requirements Gathering, Data Quality, ETL, Stakeholder Communication, Cross-Functional Collaboration, Data-Driven Decision Support
- **Professional Skills**: Analytical Thinking, Problem Solving, Storytelling with Data

Work Experience

- **Blue Kwet Consulting** — UAE (Remote)
  Data Analytics Intern — *Sep 2026*
  - Analyzed HR data using Excel to identify patterns in employee attendance, performance, and attrition.
  - Developed interactive Tableau dashboards for perfume sales analysis across branches, brands, and time periods.
  - Built a Power BI insurance claims dashboard analyzing claims trends, settlement days, policy renewals, and key business KPIs.
  - Performed data cleaning, transformation, validation, and exploratory data analysis across multiple datasets to produce structured, decision-ready insights.
- **Tata Consultancy Services (TCS)** — Kerala, India
  Data Analyst — *Jan 2022 – May 2026*
  - Analyzed business and operational datasets using SQL, Excel, Python, and Power BI to identify trends, monitor KPIs, and support data-driven decision-making.
  - Developed interactive Power BI dashboards using DAX, Power Query, data modeling, slicers, and drill-through functionality for business and operational reporting.
  - Transformed and validated raw datasets through data cleansing, validation, and transformation processes to improve reporting accuracy and consistency.
  - Automated recurring reporting workflows using Python and SQL, reducing manual reporting effort and improving reporting efficiency.
  - Worked with large reporting datasets containing 50,000+ daily records and contributed to query and reporting performance improvements.
  - Translated business requirements into stakeholder-ready dashboards, analytical reports, and actionable insights in collaboration with cross-functional teams.
  - Implemented reporting controls including row-level security and access management to support controlled and reliable report access.
  - Delivered executive and stakeholder reporting through KPI dashboards, drill-through reports, and data storytelling.

Projects

- **AI Telco Customer Churn Analysis & Prediction** (Python, Pandas, NumPy, scikit-learn, Power BI, DAX)
  - Cleaned and prepared a telecom customer dataset containing 7,043 records for analysis and machine learning.
  - Performed feature engineering including tenure groups, monthly charge groups, service counts, ticket counts, customer value segments, and risk scoring.
  - Analyzed churn patterns across contract types, customer segments, tenure, charges, and service-related attributes using Power BI.
  - Developed and compared Logistic Regression and Random Forest churn models; deployed Logistic Regression (85.7% accuracy, 0.93 ROC-AUC) to score customers into Low/Medium/High risk in Power BI.
  - Built automated analytics workflows to integrate model predictions with structured reporting outputs.
  - Created customer risk segmentation and retention-focused dashboard views to support business interpretation and decision-making.

Education

- **Kerala Technological University** — Kerala, India
  Master of Technology (M.Tech) — Computer Science — *June 2019 – April 2021*
- **Anna University** — Tamil Nadu, India
  Bachelor of Engineering (B.E.) — Computer Science — *August 2014 – April 2018*

Certifications

- AI-Driven Data Analytics Course
- Tableau Certification Training for Decision Making
- Data Science with Python Certification Course
- Microsoft SQL Server Certification Course
- Microsoft AI-900 Fundamentals
